Subject: GBAC Star accreditation

As we try to navigate these unpredictable times, USESI's goal is the safety and protection of our employees and customers. We are striving to one day see some semblance of life pre-Covid19.

Looking to the future, we've organized a committee comprised of key personnel from each region to determine how **and what** it will take to ensure our facilities are safe, including how to safely transition our staff and customers back into our places of business.

That is why we are working directly with the Global Biorisk Advisory Council, a division of The Worldwide Cleaning Industry Association to earn our **GBAC Star Accreditation**. By earning this accreditation, it shows we have invested in the processes and people to take outbreak prevention, response and recovery to the next level.

USESI is leading the charge and will be the first distributor to be accredited. We will hold the title with such facilities like: Staples Center, AT&T Stadium, Hilton Hotels, Hyatt Hotels, Las Vegas Convention Center, the city of Baltimore, Orlando International Airport, and many more.

What does GBAC STAR ACCREDITATION MEAN?

GBAC is the cleaning industry's only outbreak prevention, response and recovery accreditation for facilities. Becoming accredited means that USESI, and all our locations, will implement the most stringent protocols for cleaning, disinfection and infectious disease prevention. GBAC STAR accreditation empowers us to assure workers, customers and key stakeholders that we have a proven system in place to maintain clean, healthy and safe environments.

What does this mean for each customer?

GBAC protocols have already been deployed to our location. This means that there will be daily cleaning with specific chemicals used that are affective in disinfecting. We ask that each customer do their part by wearing their masks, washing their hands, and keeping their distance whenever possible. Our counter people are expected to supplement our routine cleanings by sanitizing the counter, pens and other high touch points after EACH customer.

Should you have any questions or concerns please reach out to Anthony Licata, Safety Manager at: alicata@usesi.com or (860) 548-3622 who will further address any safety issues.

Regards,

Randy Eddy
CEO, USESI
